

Special Session on Applied Mathematics and Information Management

IEEE 应用数学与信息管 理国际学术会议

December 10-12, 2010, Wuhan, China

<http://www.ciseng.org/2010/math>

This special session focuses on Mathematical Modeling, Algorithm, Software and their applications in Industrial Engineering, Industrial Management, Transportation Engineering, Financial Engineering, Information Engineering, Decision Making, etc. This special session will be held colocated and published together with the CiSE2010. **All papers accepted will be indexed by Ei and ISTP.**

Topics (but not limited to):

- Mathematical Modeling Theory, Methods and Related Applications
- Operation Research Theory, Methods and Related Applications
- Optimization Theory and Algorithms
- Combinatorial Optimization and Applications
- Network Optimization Theory and Applications
- Financial Engineering Theory and Applications
- Transportation Engineering Theory and Applications
- Vehicle Routing and Intelligence Algorithms Optimization
- Supply Chain, Logistics and Operations Management
- Machine Scheduling Problems
- Emergency (Disruption) Management
- Real-time Optimization
- Statistical Analysis Modeling and Related Applications
- Reliability and Error Analysis

Paper Submission:

Please upload your full papers at the conference web site:
<http://www.ciseng.org/2010/PaperSubmission.aspx>

Important Dates

Submission Deadline: Jun. 21, 2010
Acceptance Notification: Aug. 10, 2010
Conference: Dec. 10-12, 2010
